

Pitch Deck Outline

CONFIDENTIAL — PRE-SEED FUNDRAISING MATERIALS

This is a 9-slide investor deck built around the chosen wedge.

SLIDE 1 OF 9

Slide 1: Title

Title:

AI Operating CRM For Distributors And Wholesalers In WhatsApp-First Markets

Subtitle:

From system of record to system of action for message-heavy commercial workflows

Founder note:

- mention your funding fluency and why you picked this market instead of a generic CRM battle

Slide 2: Problem

Headline:

Revenue-critical workflows still happen in WhatsApp, email, spreadsheets, and human memory

Points:

- inbound inquiries get lost
- quote turnaround is slow
- follow-up is inconsistent
- finance and sales handoff breaks
- generic CRMs record the mess but do not solve the workflow

Slide 3: Why Incumbents Lose Here

Headline:

Legacy CRMs are broad systems of record, not controlled systems of action

Points:

- too horizontal
- weak for WhatsApp-first execution
- poor fit for self-hosted/control-heavy buyers
- automation is often brittle or hard to audit

Slide 4: Product

Headline:

One controlled operating layer across inbox, deals, tasks, quoting, and follow-through

Show:

- unified inbox
- deals
- AI control center
- reporting

Suggested screenshots:

- [03_inbox_conversation.png](#)
- [06_deals_proposal_stage.png](#)
- [01_ai_control_center.png](#)

Slide 5: Wedge Workflow

Headline:

Start with one painful revenue workflow

Workflow:

- inbound inquiry
- qualification
- quote/proforma draft
- follow-up
- deal progression
- invoice and collection follow-through

Key line:

The CRM is the context layer. AI does the operational work. Governance controls the risk.

Slide 6: Why Now

Headline:

Vertical AI is being funded, but only when the wedge is narrow and ROI is obvious

Points:

- AI is attracting outsized venture capital
- investors are looking for workflow-specific systems of action
- self-hosted control is a real buyer need in some markets
- distributors and wholesalers remain underserved by generic CRM vendors

Slide 7: Moat

Headline:

Control, workflow fit, and operational data create the moat

Points:

- self-hosted and zero lock-in
- workflow-specific execution layer
- auditability and safety gates
- data from real operational usage
- expansion from wedge into broader operating platform

Slide 8: GTM

Headline:

Design partners first, then wedge proof, then expansion

Points:

- 3-5 design partners
- 30-60 day pilot
- prove ROI
- convert to paid deployments
- expand inside accounts

Slide 9: Raise

Headline:

Small pre-seed to finish the wedge and prove repeatable demand

Points:

- design partners
- product completion for the wedge
- measurable proof package
- readiness for the next fundraise

Demo Flow For Investor Calls

Use this sequence in the live demo:

1. inbox conversation
2. deal context
3. AI control / governance
4. quote or invoice workflow
5. reporting / audit angle

Keep it under 7 minutes.
