

MODULE 1

Getting Oriented

A practical guide to your Clarity CRM workspace — dashboards, navigation, AI tools, and day-one setup.

WHAT YOU'LL LEARN

01

Dashboard Walkthrough

Understand every widget at a glance

02

The Today View

Your daily command centre

03

Navigation

How Contacts, Deals, Inbox, Tasks & AI connect

04

Profile & Workspace Setup

Configure notifications, profile, and preferences

05

Key Concepts

Workspaces, assignments, and permissions

1. Dashboard Walkthrough

What each section tells you at a glance

The Dashboard is your control room. Every time you log in, it gives you an instant read on where your pipeline, tasks, and team stand — without having to click into individual records.

What the top section contains:

Keep customer conversations, next actions, and pipeline movement in one place. Viewing: My

We use cookies to enhance your experience, analyze site usage, and assist in our marketing efforts. By clicking "Accept All", you consent to our use of cookies. [Learn more](#)

Accept All

Reject Non-Essential

Cookie Settings

? Tip: Use the Dashboard as your morning briefing. Check Automation Readiness first, then move to the metrics below.

Accept All

Reject Non-Essential

[Cookie Settings](#)

All metrics show a trend arrow and percentage change vs. the previous period, so you can see momentum — not just snapshots.

2. The Today View

Your daily command centre

The Today View is your personalised daily agenda. Powered by AI, it surfaces the highest-value actions you should take right now — not just a list of everything that's due.

What the Today view surfaces:

We use cookies to enhance your experience, analyze site usage, and assist in our marketing efforts. By clicking "Accept All", you consent to our use of cookies. [Learn more](#)

Accept AllReject Non-EssentialCookie Settings

? How to use it: Open the Dashboard first thing in the morning. Work through the Today items in order — stale deals, then tasks — before checking email.

Quick actions from the Today view:

3. Navigation

Contacts, Deals, Inbox, Tasks, AI — how they connect

Clarity CRM's navigation is built around a single top bar. Every module is reachable within one or two clicks, and they're deliberately connected — a contact powers a deal, a deal drives a task, a task triggers an automation.

Top navigation bar — primary modules and utility menus

Navigation bar items:

? The modules are connected: Contacts feed Deals, Deals create Tasks, Tasks trigger Automations. Everything links back to a Contact record.

All Priorities

All Triage States

What these mean:

Inbox — unified multi-channel communication hub

'Auto Applied' = triage assigned an owner/task automatically.

'Suggested' = triage scored the message but is waiting for a human decision.

'Blocked' = triage internally refused to act, usually due to opt-out, negative phrases, or low-signal content.

'Skipped' = triage did not run or did not apply, for example because the channel, direction, or settings did not qualify.

4. Profile, Workspace & Notifications

Getting your environment ready on day one

Before working in Clarity CRM, spend 10 minutes on setup. A complete profile and workspace configuration unlocks automation features and ensures you receive the right notifications.

Settings tabs to complete first:

Setting up your user profile

Your user profile (name, avatar, email signature) is separate from workspace settings. Find it under Admin ? Users ? click your name, or via the user avatar menu in the top-right corner.

Profile checklist:

5. Key Concepts

Workspaces, assignments, and permissions

Understanding three core concepts will help you get the most out of Clarity CRM from day one: how the workspace is structured, how records are assigned, and who can do what.

Workspaces

A Clarity CRM instance is a single workspace shared by your whole team. All contacts, deals, and tasks live in one shared database — but views and assignments let individuals focus on what's theirs.

Assignments

Almost every record in Clarity CRM can be assigned to a specific user. Assignments drive personalised views, automation routing, and accountability.

Permissions & Access Profiles

Permissions control what each user can see and do. They are managed through Access Profiles — groups of permissions that can be assigned to individual users.

? Best practice: Create a "Sales Rep" profile with write access to Contacts, Deals, and Tasks but read-only on Analytics and no access to Admin. Assign it to all frontline users.

Module 1 — Quick Reference Card

Tear out or bookmark this page for fast access to key URLs and tips.

KEY PAGES

Dashboard	/dashboard.php
Contacts	/contacts.php

DAY-ONE CHECKLIST

- ☐ Complete Company Profile in Settings
- ☐ Configure SMTP email connection
- ☐ Upload your profile photo & set display name
- ☐ Set your time zone in user profile
- ☐ Configure Notification Preferences
- ☐ Check Automation Readiness on Dashboard
- ☐ Review & set your Access Profile
- ☐ Add or import your first Contacts
- ☐ Create your first Deal in the pipeline
- ☐ Enable 2FA for account security

Next: Module 2 covers working with Contacts in depth — importing, tagging, lead scoring, and pipeline stage management.
