

MODULE 1

Getting Oriented

Goal: Understand the platform, navigate confidently, and set up your daily workflow from day one.

IN THIS MODULE

- 01 The Dashboard — your real-time command centre
- 02 The Today view — how Clarity focuses your day
- 03 Navigation — Contacts, Deals, Inbox, Tasks, AI
- 04 Setting up your profile, workspace & notifications
- 05 Key concepts: workspaces, assignments, permissions

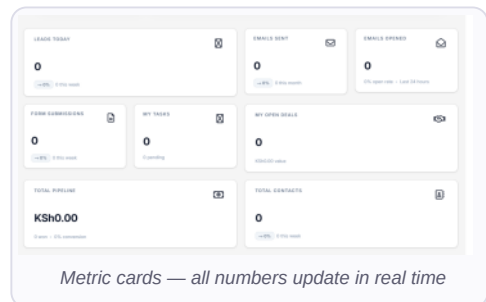

First: Entering the Platform

webXpanse starts at the login screen at acrm.webxpanse.com. Once you sign in, you land on the Dashboard — a live snapshot of everything happening in your business right now.

Dashboard — The Control Room

The Dashboard gives you an instant read on your pipeline, tasks, and outreach — without opening a single record. Every number here is live.

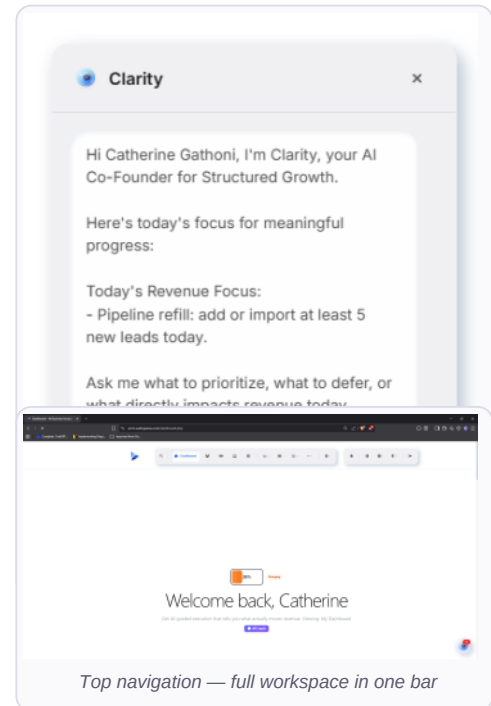

The Today View — Revenue Focus

Every morning, Clarity (your AI co-pilot) analyses your pipeline and tells you exactly what to do. This is the most important 30 seconds of your day.

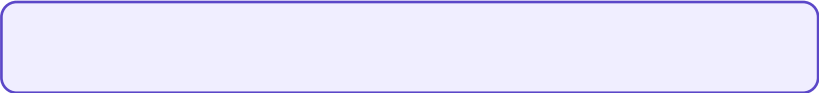

Navigation — How Everything Connects

The top navigation bar links every module. They share data: a Contact becomes a Deal, a Deal creates Tasks, Tasks trigger Automations. Nothing lives in isolation.

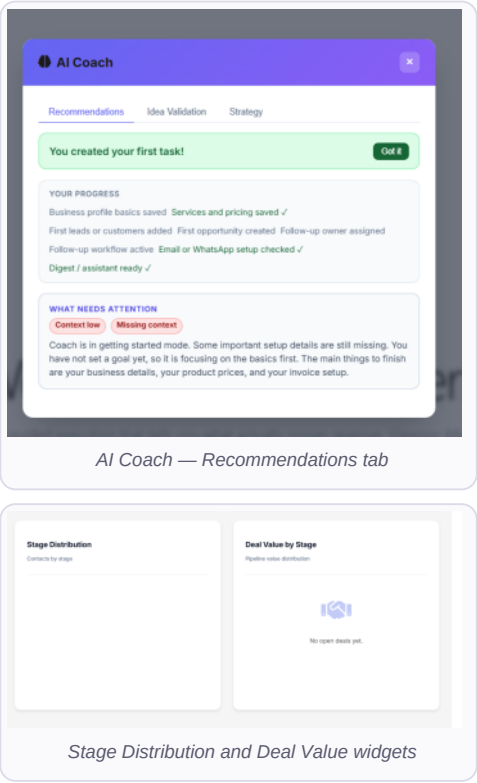

AI Coach — Your Strategic Advisor

The AI Coach is separate from the daily Clarity chat. It helps you define your strategy — target market, offer positioning, and deal movement approach. Set it up once; it improves AI suggestions across the platform.

Dashboard Widgets — Activity & Pipeline

Below the metric cards, the Dashboard shows Recent Activities, Recent Contacts, Upcoming Events, and Stage Distribution. These feed your weekly review routine.

Module 1 Exercise — Getting Oriented

Step-by-step:

- 1 Log in at acrm.webxpanse.com and note your Automation Readiness score.
- 2 Click through every item in the top navigation bar. Identify what each section is for.
- 3 Open the Clarity chat (blue bubble). Read your Today's Revenue Focus message.
- 4 Type one question into Clarity, e.g. "What should I work on first?"
- 5 Open the AI Coach and fill in the Strategy tab (target market, ICP, offer angle).
- 6 Go to Settings and confirm your email configuration is connected.
- 7 Set your Notification Preferences — choose which events trigger email vs. in-app alerts.

QUICK REFERENCE

- " Dashboard = your daily start point. Open it first, every morning.
- " Clarity AI chat = Today's brief. Use it before checking email.
- " Navigation connects everything — contacts ? deals ? tasks ? automation.
- " Settings URL: acrm.webxpanse.com/settings.php
- " Notification Preferences: acrm.webxpanse.com/notification_preferences.php
