

MODULE 1

Getting Oriented

Goal: Understand the platform, navigate confidently, and set up your daily workflow from day one.

IN THIS MODULE

- 01 The Dashboard — your real-time command centre
- 02 The Today view — how Clarity focuses your day
- 03 Navigation — Contacts, Deals, Inbox, Tasks, AI
- 04 Setting up your profile, workspace & notifications
- 05 Key concepts: workspaces, assignments, permissions

First: Entering the Platform

webXpanse starts at the login screen at acrm.webxpanse.com. Once you sign in, you land on the Dashboard — a live snapshot of everything happening in your business right now.

? *Automation Readiness tells you how much of the system is actively working for you vs. sitting idle.*

- Use your email and password to log in
- The "Welcome Back" screen confirms your dashboard is loading
- The orange battery indicator shows your Automation Readiness score

? **Bookmark the login URL — it's your daily starting point.**

Dashboard — The Control Room

The Dashboard gives you an instant read on your pipeline, tasks, and outreach — without opening a single record. Every number here is live.

? *If all metrics are zero, your first priority is to import contacts and create at least one deal to activate the dashboard.*

- Leads Today — new contacts captured from all sources
- Emails Sent / Opened — outreach volume and engagement rate
- My Tasks — pending actions assigned to you
- My Open Deals — deals you own and their combined value
- Total Pipeline — full value of all open opportunities
- Total Contacts — size of your database

The Today View — Revenue Focus

Every morning, Clarity (your AI co-pilot) analyses your pipeline and tells you exactly what to do. This is the most important 30 seconds of your day.

? *The Today brief is AI-generated from your live data. If it says "add 5 new leads" — your pipeline needs refilling.*

- Open the Clarity chat (blue bubble, bottom-right corner)
- Read "Today's Revenue Focus" — it shows stale deals, overdue tasks, and pipeline gaps
- Act on the list in order — highest-value actions first
- Ask Clarity a question: "What should I prioritise today?"

Navigation — How Everything Connects

The top navigation bar links every module. They share data: a Contact becomes a Deal, a Deal creates Tasks, Tasks trigger Automations. Nothing lives in isolation.

- Dashboard (house) — daily metrics and AI coaching
- Contacts (people) — your leads and customers
- Deals (handshake) — your sales pipeline
- Inbox (envelope) — all conversations in one place
- Targets (bullseye) — revenue and activity goals
- Analytics dropdown — reports and attribution
- Settings (gear) — workspace and profile configuration
- Bell — notifications and alerts

AI Coach — Your Strategic Advisor

The AI Coach is separate from the daily Clarity chat. It helps you define your strategy — target market, offer positioning, and deal movement approach. Set it up once; it improves AI suggestions across the platform.

? *A contact's pain point feeds the AI Coach. The more context you log, the smarter the suggestions.*

- Recommendations — proactive suggestions based on your pipeline state
- Idea Validation — test your market assumptions before scaling
- Strategy — define your ICP, offer angle, and sales motion

? **Fill in the Strategy tab first. It personalises every AI output in the system.**

Dashboard Widgets — Activity & Pipeline

Below the metric cards, the Dashboard shows Recent Activities, Recent Contacts, Upcoming Events, and Stage Distribution. These feed your weekly review routine.

- Recent Activities — last 10 logged interactions (calls, emails, notes)
- Stage Distribution — how many contacts sit at each pipeline stage
- Deal Value by Stage — where your revenue is concentrated
- Upcoming Events — calendar reminders linked to contacts
- Recent Contacts — last 10 contacts added or updated

? Module 1 Exercise — Getting Oriented

Step-by-step:

- 1 Log in at acrm.webxpanse.com and note your Automation Readiness score.
- 2 Click through every item in the top navigation bar. Identify what each section is for.
- 3 Open the Clarity chat (blue bubble). Read your Today's Revenue Focus message.
- 4 Type one question into Clarity, e.g. "What should I work on first?"
- 5 Open the AI Coach and fill in the Strategy tab (target market, ICP, offer angle).
- 6 Go to Settings and confirm your email configuration is connected.
- 7 Set your Notification Preferences — choose which events trigger email vs. in-app alerts.

QUICK REFERENCE

- Dashboard = your daily start point. Open it first, every morning.
- Clarity AI chat = Today's brief. Use it before checking email.
- Navigation connects everything — contacts ? deals ? tasks ? automation.
- Settings URL: acrm.webxpanse.com/settings.php
- Notification Preferences: acrm.webxpanse.com/notification_preferences.php
